Five water samples were also sent for testing, which were found to be unsatisfactory for drinking purpose. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. Death of a 24 year old female has occurred on 22/10/2024 due to Acute Gastroenteritis, Septic Shock with AKI.

AS/MRG/2024/42/2513	Assam	Marigaon	Food Poisoning	10	0	11-10-2024	15-10-2024	Under Control	Cases were reported from Laharighat BPHC-Model Hospital, Village: Borbori, Sub-District: Laharighat, District: Marigaon. Cases presented with diarrhea, vomiting after consumption of wild mushrooms. District RRT investigated the outbreak. IEC and Food safety education was given to the community on Mushroom poisoning and also advised not to consume wild mushrooms if they are doubtful about its edible nature. The outbreak might be caused by consumption of wild mushrooms.
BH/BHJ/2024/42/2514	Bihar	Bhojpur	Acute Diarrheal Disease	11	0	15-10-2024	15-10-2024	Under Surveillance	Cases were reported from PHC Koilwar, Village Giddha, Sub-District Koilwar, District Bhojpur. Cases presented with loose stools, vomiting and pain abdomen. Age group of the affected cases were 3-80 years. District RRT investigated the outbreak. Cases treated symptomatically. Community awareness and health education given by peripheral team on hygiene and sanitation.
BH/GYA/2024/42/2515	Bihar	Gaya	Acute Diarrheal Disease	22	1	14-10-2024	14-10-2024	Under Surveillance	Cases were reported from CHC Bodh Gaya, Village Majhauli, District Gaya. Cases presented with loose stools and vomiting. Age group of the affected cases was 5-75 years. District RRT investigated the outbreak. Cases treated symptomatically. Community awareness and health education given by peripheral team on hygiene and sanitation. A 7 year old female expired due to the illness.
CT/BMT/2024/42/2516	Chhattisgarh	Bemetara	Acute Diarrheal Disease	113	0	16-10-2024	16-10-2024	Under Surveillance	Cases were reported from PHC Gudheli, Village: Dhaba, Sub-District: Bhimbhauri, Cases presented with diarrhea and vomiting. Four stool samples were sent to Medical College Raipur, all were negative on culture. Two water samples were sent to PHE Bemetara, all were found to be safe for drinking. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. The outbreak might be caused by consumption of contaminated water.

CT/KNK/2024/42/2517	Chhattisgarh	Kanker	Mumps	12	0	16-10-2024	17-10-2024	Under Surveillance	Cases were reported from Health Facility: Kottara, Village: Kottara, Sub-District: Charama, District: Kanker. Cases presented with fever and swelling in the salivary glands. Seven blood samples were sent to GMC Jagdalpur, all were positive for Mumps IgM by ELISA. All cases were less than 15 years of age. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
CT/SUK/2024/42/2518	Chhattisgarh	Sukma	Acute Diarrheal Disease	82	7	16-10-2024	17-10-2024	Under Surveillance	Cases were reported from Village: Chitalnar, Sub-District: Chhindgarh. Two stool samples were sent to DH Sukma, both were positive for E.coli on culture & negative for Cholera on culture. Total 14 water samples were sent to PHE Sukma, out of which 1 was found to be contaminated. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. Health camp was organized. ORS & Zinc were distributed. The outbreak might be caused by consumption of contaminated water. Death of 4 females (27 year, 45 year and two 58 year) and 3 males (45 year, 47 year & 61 year) have occurred due to dehydration.
GJ/BVN/2024/42/2519	Gujarat	Bhavnagar	Food Poisoning	25	0	16-10-2024	18-10-2024	Under Control	Cases were reported from Health Facility: Luvarvav, Village: Jamwali, Sub-District: Palitana, District: Bhavnagar. Cases presented with diarrhea and vomiting after attending a birthday celebration. The affected age group was 5-11 years. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.

GJ/SUR/2024/42/2520	Gujarat	Surat	Acute Diarrheal Disease	44	0	16-10-2024	17-10-2024	Under Control	Cases were reported from an Ashram under PHC Vadpada, Village: Umargot, Sub-District: Umarpada, District: Surat. Cases presented with diarrhea and vomiting. The affected age group was 5-44 years. Total 2 serum samples were taken & sent to Civil Hospital Surat, both were negative for any entero-pathogen on culture. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
GJ/SUR/2024/42/2521	Gujarat	Surendranagar	Food Poisoning	204	0	17-10-2024	18-10-2024	Under Control	Cases were reported from CHC Sudamada, Village: Sudamda, Sub-District: Sayla, District: Surendranagar. Cases presented with diarrhea, vomiting and abdominal pain after attending a religious ceremony on 17-10-2024. The affected age group was 5-14 years. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
GJ/SUR/2024/42/2522	Gujarat	Surendranagar	Food Poisoning	57	0	14-10-2024	15-10-2024	Under Control	Cases were reported from Health Facility: Raysangpar, Village: Kuntalpur, Sub-District: Muli, District: Surendranagar. Cases presented with diarrhea and vomiting. The affected age group was 5-44 years. One vomitus sample was taken and sent to MGS General Hospital, which was negative for any organism on culture. Six food samples were taken and sent to Food & Drug Department for testing. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.

GJ/VAL/2024/42/2523	Gujarat	Valsad	Food Poisoning	4	1	18-10-2024	19-10-2024	Under Control	Cases were reported from Health Facility: Sildha, Village: Pendhardevi, Sub-District: Kaprada, District: Valsad. Cases presented from a same family with diarrhea and vomiting after consumption of food from a common kitchen. The affected age group was 5-60 years. One stool and water sample was collected & sent to GMERS Valsad. Stool sample was negative for Cholera on culture and water sample showed fecal contamination. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. Death of a 13 year old male child has occurred due to the illness.
GJ/VAL/2024/42/2524	Gujarat	Valsad	Acute Diarrheal Disease	6	0	14-10-2024	15-10-2024	Under Control	Cases were reported from Health Facility: Orwad, Village: Orwad (CT), Sub-District: Pardi, District: Valsad. Cases presented with diarrhea and vomiting. The affected age group was 15-44 years. One stool and 2 water samples were collected and sent to GMERS Medical College. Stool sample was negative for Cholera on culture and water samples were fit for drinking water. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
JK/BRM/2024/42/2525	Jammu and Kashmir	Baramulla	Chickenpox	17	0	16-10-2024	18-10-2024	Under Control	Cases were reported from Health Facility: Kreeri, Village: Dungdara, Sub-District: Kreeri, District: Baramulla. Cases presented with fever with rash. All cases were diagnosed clinically. The affected age group was 6-15 years. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.

JK/KUL/2024/42/2526	Jammu and Kashmir	Kulgam	Hepatitis A	18	0	19-10-2024	19-10-2024	Under Control	Cases were reported from a school under Health Facility: Chawgam, Village: Khara Gund, Sub-District: Devsar, District: Kulgam. Cases presented with jaundice. The affected age group was 5-14 years. Two water and 18 blood samples were collected and sent to DPHL GMC Anantnag. Both the water samples were found to be unsatisfactory for drinking purpose. Out of 18 blood samples, 14 were positive for Anti-HAV IgM by ELISA. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
JH/DEO/2024/42/2527	Jharkhand	Deoghar	Scrub Typhus	5	0	16-10-2024	17-10-2024	Under Surveillance	Cases were reported from Village Malpur, Sub-District Deoghar, District Deoghar. Cases presented with fever. Total 3 blood samples were sent for testing, all were positive for Scrub typhus IgM by ELISA. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on vector control measures, hygiene and sanitation.
JH/GRW/2024/42/2528	Jharkhand	Garhwa	Acute Diarrheal Disease	21	2	14-10-2024	14-10-2024	Under Control	Cases were reported from Village Kailan, Sub-District Bhawnathpur, District Garhwa. Cases presented with loose stools and vomiting. Two stool samples were collected and sent to National Institute for Research in Bacterial Infections, Kolkata. Stool samples did not show growth of any pathogenic organism. District RRT investigated the outbreak. Cases treated symptomatically. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. Three deaths have occurred due to the illness (8 year/male and 32 year/female expired on 10-10-2024, 5 year/male expired on 13-10-2024).

JH/GOD/2024/42/2529	Jharkhand	Godda	Acute Diarrheal Disease	7	0	19-10-2024	19-10-2024	Under Surveillance	Cases were reported from Village Khiraundhi, Sub-District Meharma, District Godda. Cases presented with loose stools. Age group of the affected cases was 6-65 years. District RRT investigated the outbreak. Cases treated symptomatically. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
JH/SRK/2024/42/2530	Jharkhand	Saraikela Kharsawan	Acute Diarrheal Disease	10	0	14-10-2024	14-10-2024	Under Control	Cases were reported from Village Gudri, Sub-District Ichagarh, District Saraikela Kharsawan. Cases presented with vomiting and diarrhea. Age group of the affected cases was 6-65 years. Two water samples were collected & sent to MGM Medical College and Hospital, Jamshedpur. Both the samples were found to be unfit for potable purpose (Enterococcus fecalis detected). District RRT investigated the outbreak. Cases treated symptomatically. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
JH/WSB/2024/42/2531	Jharkhand	West Singhbhum	Acute Diarrheal Disease	17	0	19-10-2024	19-10-2024	Under Control	Cases were reported from HSC Oronga CHC Goilkera, Village Chitir, Sub-District Goilkera, District West Singhbhum. Cases presented with pain abdomen, vomiting and diarrhea. Age group of the affected cases were 19-28 years. Two stool samples were collected & sent for testing. Stool samples did not show growth of any pathogenic organism on culture. District RRT investigated the outbreak. Cases treated symptomatically. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.

KN/RIC/2024/42/2532	Karnataka	Raichur	Acute Diarrheal Disease	21	0	19-10-2024	20-10-2024	Under Control	Cases were reported from PHC: Masarkal, Village: Buddinni, Sub-District: Devadurga, District: Raichur. Cases presented with vomiting, loose motions. The affected age group was 5-65 years. Six stool samples were collected & tested at RIMS, all were negative on culture & microscopy. Total 23 water samples were collected & tested at PHC Lab by H2S method, out of which 9 were found to be non-potable. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. The outbreak might be caused by consumption of contaminated drinking water.
KL/ALP/2024/42/2533	Kerala	Alappuzha	Hepatitis A	16	0	16-10-2024	17-10-2024	Under Surveillance	Cases were reported from a college under DH Chengannoor, Sub-District: Chengannur, District: Alappuzha. Cases presented with fever. Seven samples tested at DH Chengannoor, out of which 3 were positive for Anti-HAV IgM by ELISA. All other cases were epidemiologically linked cases. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on vector control measures, hygiene and sanitation.
KL/ALP/2024/42/2534	Kerala	Alappuzha	Acute Diarrheal Disease	66	0	15-10-2024	17-10-2024	Under Surveillance	Cases were reported from FHC Punnapra North, Village: Paravoor, Sub-District: Ambalappuzha, District: Alappuzha. Cases are presented with abdominal pain, loose stool after attending a social gathering. Two water samples were sent to PH lab, both were found to be unsatisfactory. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.

KL/ERN/2024/42/2535	Kerala	Ernakulam	Hepatitis A	5	0	17-10-2024	18-10-2024	Under Control	Cases were reported from a college under PHC Kalamassery, Sub-District: Kanayannur, District: Ernakulam. Cases presented with fever, jaundice, nausea, vomiting and abdominal pain. One sample was sent to RPHL Ernakulam, which was positive for Anti-HAV IgM by ELISA. All other cases were epidemiologically linked cases. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
KL/ERN/2024/42/2536	Kerala	Ernakulam	Dengue	12	0	14-10-2024	17-10-2024	Under Surveillance	Cases were reported from UPHC Thrikkakkara, Sub-District: Kanayannur, District: Ernakulam. Cases are presented with fever, myalgia, nausea, vomiting and head ache. Two samples were sent to RPHL, both were positive for Dengue IgM by ELISA. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on vector control measures, hygiene and sanitation. (Vector indices: BI-33, CI-25 and HI-20)
KL/ERN/2024/42/2537	Kerala	Ernakulam	Hepatitis A	31	0	14-10-2024	17-10-2024	Under Surveillance	Cases were reported from a college under FHC Kakkanad, Sub-District: Kanayannur, District: Ernakulam. Cases presented with fever, myalgia, general weakness, vomiting and nausea. The affected age group was 18-22 years. Five blood samples were collected and sent to RPH Lab, all were positive for Anti-HAV IgM by ELISA. All other cases were epidemiologically linked cases. Total 12 water samples were sent to RPH Lab for Bacteriological and Chemical analysis, out of which 6 showed presence of Coliform. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. The outbreak might be caused by consumption of contaminated drinking water.

KL/ERN/2024/42/2538	Kerala	Ernakulam	Acute Diarrheal Disease	32	0	16-10-2024	17-10-2024	Under Control	Cases were reported from a college hostel under THQH Kothamangalam, Sub-District: Kothamangalam, District: Ernakulam. Cases presented with nausea, abdominal pain, vomiting loose stools, fever and head ache. Two water samples were collected and sent to RPH Lab Ernakulam for bacteriological analysis, both showed presence of E.coli. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
KL/IDK/2024/42/2539	Kerala	Idukki	Mumps	20	0	16-10-2024	18-10-2024	Under Surveillance	Cases were reported from a school under PHC Pampadumpara, Sub-District: Udumbanchola, District: Idukki. Cases presented with fever and painful swelling of the parotid glands. The affected age group was 4-6 years. All cases were fully vaccinated. All cases were diagnosed clinically. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
KL/KOZ/2024/42/2540	Kerala	Kozhikode	Hepatitis A	47	0	18-10-2024	18-10-2024	Under Surveillance	Cases were reported from a college under CHC Mukkom, Village: Koduvally, Sub-District: Kozhikode, District: Kozhikode. Cases presented with fever, anorexia, nausea & vomiting. One sample was sent to KMCT Hospital, Mukkom, which was positive for Anti-HAV IgM by ELISA. All other cases were epidemiologically linked cases. Five water samples were taken and sent to CWRDM (Centre for Water Resources Development and Management). District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. The outbreak might be caused by consumption of contaminated drinking water.

KL/KOZ/2024/42/2541	Kerala	Kozhikode	Hepatitis A	26	0	14-10-2024	15-10-2024	Under Surveillance	Cases were reported from TH Thamarassery, Village: Raroth, Sub-District: Thamarassery, District: Kozhikode. Cases presented with fever, anorexia, nausea & vomiting. One blood sample was sent to Santhi Hospital, Omasseri, which was positive for Anti-HAV IgM by ELISA. All other cases were epidemiologically linked cases. Two water samples were sent to KWA Lab Narikuni, both showed presence of E.coli on water analysis. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. The outbreak might be caused by consumption of contaminated drinking water from a common public well.
KL/MLP/2024/42/2542	Kerala	Malappuram	Hepatitis A	40	0	14-10-2024	16-10-2024	Under Surveillance	Cases were reported from PHC Vazhikadavu, Sub-District: Nilambur, District: Malappuram. Cases presented with fever, vomiting, fatigue, headache and jaundice. The most affected age group was 6-18 years. Two blood samples were sent for testing, both were positive for Anti-HAV IgM by ELISA. Suspected water samples were collected & sent for analysis. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
KL/MLP/2024/42/2543	Kerala	Malappuram	Hepatitis A	31	0	14-10-2024	14-10-2024	Under Surveillance	Cases were reported from CHC Vengara, Sub-District: Tirurangadi, District: Malappuram. Cases presented with fever, headache, vomiting, and jaundice. The affected age group was 5-30 years. Two blood samples were sent for testing, both were positive for Anti-HAV IgM by ELISA. Suspected water samples were collected & sent for analysis. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation. The outbreak might be caused by consumption of contaminated food or water.

KL/PLK/2024/42/2544	Kerala	Palakkad	Hepatitis A	208	0	16-10-2024	16-10-2024	Under Surveillance	Cases were reported from PHC Thiruvegappura, PHC Vilayur, Village: Koppam, Sub-District: Pattambi, District: Palakkad. Cases presented with jaundice, fever, fatigue, and nausea. Total 11 serum samples were collected and sent to IPHL, District Hospital, Palakkad, out of which 5 were positive for Anti-HAV IgM by ELISA. Water samples were collected from three sources & sent for bacteriological examination. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
KL/PLK/2024/42/2545	Kerala	Palakkad	Chickenpox	5	0	15-10-2024	16-10-2024	Under Control	Cases were reported from UPHC Diara Street, Sub-District: Palakkad, District: Palakkad. Cases presented with fever with rash. All cases were clinically diagnosed. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
KL/WYN/2024/42/2546	Kerala	Wayanad	Acute Gastroenteritis	21	0	14-10-2024	18-10-2024	Under Surveillance	Cases were reported from an ashram school under FHC Appapara, Village: Thirunelly, Sub-District: Mananthavady, District: Wayanad. Cases are presented with Acute Gastroenteritis. One water sample was tested at KWA Mananthavady, which was positive for E.coli. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.

MP/ALJ/2024/42/2547	Madhya Pradesh	Alirajpur	Food Poisoning	7	0	14-10-2024	15-10-2024	Under Control	Cases reported from DH Alirajpur, Village: Darkali, Sub-District: Sondawa, District: Alirajpur. Cases presented from a same family with vomiting and loose motion after consumption of food from a common kitchen. The affected age group was 3-60 years. Total 2 stool and water samples were collected & sent to DPHL Indore. Both stool samples were negative on culture. Water samples were found to be potable. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
MP/ASN/2024/42/2548	Madhya Pradesh	Ashoknagar	Dengue	70	0	15-10-2024	15-10-2024	Under Control	Cases were reported from DH Ashoknagar, Village: Kalabhag, Sub-District: Isagarh, District: Ashoknagar. Cases presented with fever with rash & headache. Total 416 samples were collected and sent to DH Guna and Shivpuri, out of which 70 were positive for Dengue NS1 Ag by ELISA. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on vector control measures, hygiene and sanitation. Fever and Larval survey was done. Fogging was done in the affected area.
MP/BHN/2024/42/2549	Madhya Pradesh	Bhind	Food Poisoning	30	0	15-10-2024	15-10-2024	Under Control	Cases reported from CHC Ater, PHC Surpura, HWC Kyaripura, Village Kyaripura, District Bhind. Cases presented with diarrhea and vomiting after consumption of food in a community feast in a temple. The affected age group was 10-85 years. Five Stool samples were collected & Sent to GRMC Microbiology Lab. No growth of any pathogenic organism was found on culture after 48 hours of incubation. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.

MP/BRH/2024/42/2550	Madhya Pradesh	Burhanpur	Dengue	30	0	15-10-2024	15-10-2024	Under Control	Cases reported from SHC Boribujurg, PHC Dhulkot, Block Burhanpur, District Burhanpur. Cases presented with fever. The affected age group was 3-80 years. Five samples were sent to DH Burhanpur, out of which 2 were positive for Dengue NS1 Antigen by ELISA. District RRT investigated the outbreak. Community awareness and health education given by peripheral health team on dengue. Fever and container survey were conducted in the affected and the surrounding areas, and preventive and curative measures were taken. Fogging, source reduction were done.
MP/DND/2024/42/2551	Madhya Pradesh	Dindori	Acute Diarrheal Disease	13	0	15-10-2024	15-10-2024	Under Surveillance	Cases were reported from CHC Samnapur, PHC Samnapur, Village Bilaikhar, Sub- District: Dindori, District: Dindori. Cases presented with diarrhea & vomiting. The most affected age group was 18-60 years. Two water samples were collected & sent to Medical College Jabalpur (Microbiology Department), out of which 1 was found to be non-potable. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on control measures, hygiene and sanitation.
MP/ENM/2024/42/2552	Madhya Pradesh	East Nimar	Chikungunya	52	0	16-10-2024	16-10-2024	Under Control	Cases reported from LIG Colony, Urban Block Khandwa, District Khandwa. Cases presented with fever. The affected age group was 11-80 years. Total 8 Serum samples were collected & sent to District Hospital, Khandwa, out of which 7 were positive for Chikungunya. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on vector control measures, hygiene and sanitation.

MP/JHB/2024/42/2553	Madhya Pradesh	Jhabua	Mumps	6	0	16-10-2024	17-10-2024	Under Control	Cases reported from a school in Village Khakarapada, Block Petlawad. Cases presented with salivary gland swelling. The affected age group was 5-10 years. All cases were vaccinated from MR vaccine. Total 6 blood sample were collected & sent to AIIMS Bhopal, out of which 5 were positive for Mumps on culture. District RRT investigated the outbreak. Community awareness and health education given by peripheral team on symptoms, prevention and treatment of Mumps disease.
MP/KHR/2024/42/2554	Madhya Pradesh	Khargone	Acute Diarrheal Disease	81	0	15-10-2024	15-10-2024	Under Surveillance	Cases reported from PHC Padliya, Village Hodadiya, Block Maheshwar, District Khargone.
