(N=28)

Disease wise no of outbreaks reported under IDSP during 2022-2026
till 33rd wk of Every Year

Unique ID.	Name of State-UT	Name of District	Disease-Illness	No. of Cases	No. of Deaths	Date of Start Outbreak	Current Status	Comments-Action Taken	Unique ID.
AR/EAS/2026/33/1341	Arunachal Pradesh	East Kameng	Acute Diarrhoeal Disease	17	0	10-08-2026	13-08-2026	Under Surveillance	Cases of loose watery stools, nausea and vomiting were reported from Seppa Public School, Sub-District Seppa HQ, District East Kameng. District RRT investigated the outbreak. The affected age group was 1-38 years. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/BAR/2026/33/1342	Assam	Barpeta	Japanese Encephalitis	1	1	11-08-2026	12-08-2026	Under Surveillance	An 18 year-old male reported with fever, altered sensorium and sudden pain in the right side of body from Village Bahmura, Sub-District Barpeta, District Barpeta. District RRT investigated the outbreak. His CSF and serum samples were collected on 30.07.2026 and tested positive for JE Virus on 31.07.2026 at Department of Microbiology, Barpeta Medical College and Hospital. The patient died on 10.08.2026 in BMCH. The immediate cause of death was recorded as Japanese Encephalitis. Fever survey, fogging and distribution of

									ITBN were done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
AS/BON/2026/33/1343	Assam	Bongaigaon	Dengue	24	0	16-08-2026	16-08-2026	Under Surveillance	Cases of fever with bodyache were reported from Villages Rangapani and Simlabari, Sub-District Srijangram, District Bongaigaon. District RRT investigated the outbreak. Most of the affected cases were in the age group of 14-58 years. House to house surveillance was done. 24 blood and serum samples were tested at DPHL Bongaigaon(NS1 Ag ELISA). 12 tested positive for Dengue. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
AS/CHA/2026/33/1344	Assam	Charaideo	Measles	11	0	10-08-2026	10-08-2026	Under Surveillance	Cases of fever with rash were reported from Village Sapekhati Gaon, Sub-District Sonari, District Charaideo. District RRT investigated the outbreak. The affected age group was 9 months-51 years. All cases tested positive for Measles IgM at WHO-NPSN Dibrugarh. Community awareness and health education given by the peripheral team on isolation of

									cases and vaccination, hygiene and sanitation.
AS/DIM/2026/33/1345	Assam	Dima Hasao	Acute Diarrhoeal Disease	27	0	10-08-2026	11-08-2026	Under Surveillance	Cases of abdominal pain, loose motion, fever with or without vomiting were reported from Village Lasang, Sub-District Haflong, District Dima Hasao. District RRT investigated the outbreak. A community feast was organized in the village where pork was served, and some villagers took the leftover cooked pork home and consumed it the following morning. Most of the affected cases were adults. 3 rectal swab samples were tested, and all showed growth of normal gut flora (E. coli), with no pathogenic organisms such as Salmonella spp. or Vibrio cholerae isolated. 2 water samples were tested by MPN and both were found to be unsatisfactory (Class IV). Cases were treated at Mahur BPHC and Haflong Civil Hospital. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CG/DHA/2026/33/1346	Chhattisgarh	Dhamtari	Hepatitis A	16	0	10-08-2026	11-08-2026	Under Surveillance	Cases of nausea, abdominal pain, fever and yellow colored urine were reported from Village Baniyapara, Sub-District Dhamtari, District

									Dhamtari. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Itwari Bazar. Cases were in the age group 9 - 65 years. 16 serum samples were collected and sent to DH Atal Arogya Lab for testing, of which 12 tested positive for Hepatitis A by HAV IgM ELISA. Chlorine tablets were distributed to the households. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CG/SUR/2026/33/1347	Chhattisgarh	Surguja	Malaria	45	0	08-08-2026	10-08-2026	Under Surveillance	Cases of fever with chills were reported from Village Matringa, Sub-District Udaypur, District Surguja. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated with anti-malarial medicine. Cases were in the age group 7-61 years. 681 samples were tested at CHC Udaipur, of which 45 tested positive for <i>Plasmodium falciparum</i> (Pf). Fogging was done in the affected area. Community awareness and health education was given by the peripheral team on vector control measures, hygiene and sanitation.

JK/UDH/2026/33/1348	Jammu and Kashmir	Udhampur	Dengue	94	0	10-08-2026	10-08-2026	Under Surveillance	Cases of fever, headache, bodyache and rashes were reported from an urban area of Udhampur, Block Chenani, District Udhampur. District RRT investigated the outbreak. House to house fever survey was done. The affected age group was 5-44 years. 94 serum samples were tested at DPHL GMC Udhampur. 2 samples were found to be positive for Dengue by NS1 Ag ELISA. Anti-larval activities were done in the affected area. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/ERA/2026/33/1349	Kerala	Ernakulam	Acute Gastroenteritis	85	0	11-08-2026	13-08-2026	Under Surveillance	Cases of loose motion and abdominal pain were reported from Village Puthenvelikkara (CT) ward no. IV, Sub-District Paravur, District Ernakulam. District RRT investigated the outbreak. Cases developed symptoms after eating food at a food fest event organized at St Thomas L P School, Thuruthoor. Cases were treated at TH Puthenvelikkara. All cases recovered. Both children and adults were affected. Community awareness and health

									education was given by the peripheral team on safe food habits, hygiene and sanitation.
KL/KAN/2026/33/1350	Kerala	Kannur	Hepatitis A	47	0	11-08-2026	11-08-2026	Under Surveillance	Cases of anorexia, abdominal pain, fever and yellow colored urine were reported from Sub-District Taliparamba, District Kannur. District RRT investigated the outbreak. A Hepatitis A outbreak was reported among individuals who visited Samba Soccer City Turf, Nedumunda, under Chuzhali PHC, in connection with World Cup screening. All identified cases reported consumption of water and-or soft drinks served at the venue. A total of 47 cases were identified, including 20 from Chengalayi FHC, 21 from Kurumathur FHC, and 6 from Chuzhali PHC. The index case, Afeed, a 17-year-old male, developed symptoms on 22-07-2026 and was admitted to Geora Hospital, Taliparamba, with positive HAV IgM. Subsequent cases were reported from 24-07-2026 onwards. The primary water source tested positive for E. coli, indicating possible faecal contamination and a potential common-source exposure. Cases were in the age group 8-45 years. 4 water samples were collected and

									sent to KWA, Irikkur, of which 3 tested positive for coliforms and E. coli. 14 blood samples were tested for HAV IgM by ELISA, and all 14 tested positive for Hepatitis A from various hospitals. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KL/MAL/2026/33/1351	Kerala	Malappuram	Dengue	32	0	14-08-2026	14-08-2026	Under Surveillance	Cases of fever with myalgia and body pain were reported from Village Edarikkode, Sub-District Ernad, District Malappuram. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Edarikkode. Cases were in the age group 15-38 years. 3 blood samples were tested for Dengue NS1 antigen by ELISA at DPHL, Malappuram, and all 3 samples tested positive for Dengue. Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation
KL/PAL/2026/33/1352	Kerala	Palakkad	Jaundice	12	0	14-08-2026	14-08-2026	Under Surveillance	Cases of anorexia, abdominal pain, fever and yellow colored urine were reported from Village Pookottukavu, Sub-District Ottappalam, District

									Palakkad. District RRT investigated the outbreak. House to house survey was done. The probable cause of the outbreak was contaminated juice and snacks sold at nearby tea shops and juice shops in Palakkad. Cases were students of Munnorkkode High School. Cases were treated at health facilities. 1 serum sample was sent to IPHL, Palakkad, for confirmatory testing by HAV IgM ELISA and tested negative for Hepatitis A. Cases were in the age group 11-45 years. 3 water samples were sent to IRTC, Mundur, for testing and all 3 tested negative for coliforms and <i>E. coli</i> . Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation
KL/PAL/2026/33/1353	Kerala	Palakkad	Dengue	54	0	12-08-2026	12-08-2026	Under Surveillance	Cases of fever with myalgia were reported from Village Vaniyamkulam-I, Sub-District Attappadi, District Palakkad. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at CHC Agali. Cases were in the age group 5-60 years. 20 blood samples were collected and tested using the IgM ELISA test. 7

									were positive for Dengue at ATTSH, Kottathara, and 11 were positive for Dengue at the Regional Public Health Laboratory, Palakkad. Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
KL/THI/2026/33/1354	Kerala	Thiruvananthapuram	Hepatitis A	40	0	13-08-2026	13-08-2026	Under Surveillance	Cases of nausea, abdominal pain and fever were reported from Village Anad, Sub-District Nedumangad, District Thiruvananthapuram. District RRT investigated the outbreak. House to house survey was done. Cases were treated at FHC Anad. 4 water samples were collected and sent to RGC B for bacteriology and virology examination. The samples were negative for both Hepatitis A and E. Coliforms were present in 3 samples. 40 blood samples were collected and tested for Hepatitis A by HAV IgM ELISA at private laboratories, and all 40 tested positive. The affected age group was 5-74 years. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food

									habits, hygiene and sanitation.
MH/NAN/2026/33/1355	Maharashtra	Nanded	Suspected Food Poisoning	32	0	10-08-2026	10-08-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village - Amraabad, Sub-District Deglur, District Nanded. District RRT investigated the outbreak. Cases fell ill after eating food served at Vasantrao naik Ashram Primary School. Cases were treated at SDH Degloor. Cases were mostly in the age group of 9-16 years. All cases recovered. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
ML/EAS/2026/33/1356	Meghalaya	East Jaintia Hills	Human Rabies	1	1	12-08-2026	13-08-2026	Under Surveillance	A case was reported from Village Lad Narwan, Sub-District Saipung, District East Jaintia Hills. A 76-years-old-male with complaints of irrelevant behavior, altered sensorium and hydrophobia was admitted to Ialong Civil Hospital, Jowai on 09.08.2026. Later, he was referred to Civil Hospital, Shillong for further treatment. The patient expired on 12.08.2026. The deceased had a history of contact with wild animals (dog). District RRT investigated the outbreak. 8

									contacts were traced and PEP with ARV was administered. An awareness programme was organized in collaboration with the Veterinary department and DIPR at Jalaphet market. The activities conducted included mass awareness on Rabies, mass dog vaccination by the Veterinary department and miking on Rabies prevention by the DIPR. Community awareness and health education was given by the peripheral team on hygiene and sanitation.
OD/BHA/2026/33/1357	Odisha	Bhadrak	Suspected Food Poisoning	9	0	14-08-2026	14-08-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Chingudipur, Sub-District Bhandari Pokhari, District Bhadrak. District RRT investigated the outbreak. Cases fell ill after eating food served at a birthday party. Cases were treated at PHC Barikpur. Most cases were in the age group of 15-44 years. All cases recovered. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.

OD/KAL/2026/33/1358	Odisha	Kalahandi	Acute Diarrhoeal Disease	12	0	15-08-2026	15-08-2026	Under Surveillance	Cases of loose motion, abdominal pain and vomiting were reported from Village Mahajal, Sub-District Thuamul Rampur, District Kalahandi. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Nakrundi. 2 water samples and 2 rectal swabs were collected and sent to DPHL Kalahandi. Water samples showed OT <0.001 ppm and were negative for H2S. No enteropathogenic organisms were isolated from the rectal swab samples, and the water samples showed no microbiological contamination suggestive of enteropathogens. Most cases were in the age group of 5-14 years. Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
TN/TIR/2026/33/1359	Tamil Nadu	Tirupathur	Fever	12	0	12-08-2026	13-08-2026	Under Surveillance	Cases of fever with body pain were reported from Village Vasanthapuram, Sub-District Vaniyambadi, District Tirupathur. District RRT investigated the outbreak. House to house survey was done. Cases were students of primary section at PUPS

									Kanavaipudhur. Cases were treated at PHC Vallipattu. Anti-larval activities was done. Health education regarding vector control measures, hygiene and sanitation was given to the school administration.
UP/JAU/2026/33/1360	Uttar Pradesh	Jaunpur	Chickenpox	12	0	10-08-2026	12-08-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Machhaligaon (12 cases) and Village Khanpur (15 cases), Sub-District Badlapur, District Jaunpur. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. The affected age group was 2-50 years. Out of 10 serum samples collected, 8 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
UK/NAI/2026/33/1361	Uttarakhand	Nainital	Hepatitis A	60	0	12-08-2026	14-08-2026	Under Control	Cases were reported from Village Jeolikote, Sub-District Rajarhat, District Nainital. District RRT investigated the outbreak. House to house survey was done. Cases were treated at PHC Jyolikot. A total of 60 serum samples collected from 11.08.2026 to 07.09.2026, 53 samples tested positive for Hepatitis A (IgM

									ELISA). The affected age group was 3-60 years. Chlorine tablets were distributed to the households. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
WB/ALI/2026/33/1362	West Bengal	Alipurduar	Chickenpox	12	0	10-08-2026	10-08-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Chandirjhar, Sub-District Alipurduar - II, District Alipurduar. District RRT investigated the outbreak. Active search for fever cases was done. Cases were treated symptomatically. Both children and adults were affected. 10 blood serum samples were collected and sent to the NBMCH Virology Lab for Chickenpox IgM ELISA testing. 6 samples were tested positive. All cases tested negative for Malaria RDK. Community awareness and health education was given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
WB/BAN/2026/33/1363	West Bengal	Bankura	Hepatitis A	33	0	01-08-2026	11-08-2026	Under Surveillance	Cases of anorexia, abdominal pain, fever and yellow colored urine were reported from Village and Sub-District Taldangra, District Bankura. District RRT investigated the outbreak. House to house

									survey was done. The probable cause of the outbreak was contaminated water. Cases were treated at RH Taldangra. Both children and adults were affected. Out of 18 blood samples collected, 8 samples showed elevated bilirubin levels. All 8 samples with elevated bilirubin were tested for Hepatitis A Virus (HAV), Hepatitis E Virus (HEV), and Leptospira IgM antibodies by ELISA at the School of Tropical Medicine, Kolkata. The laboratory findings revealed that all 8 samples were positive for HAV (IgM ELISA). Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
WB/HOO/2026/33/1364	West Bengal	Hooghly	Suspected Food Poisoning	11	0	13-08-2026	13-08-2026	Under Surveillance	Cases of loose motion were reported from Village Jaysinha Chak, Sub-District Arambag, District Hooghly. District RRT investigated the outbreak. House to house survey was done. Cases developed symptoms 4-5 hours after eating food served at a religious gathering. Cases were treated at health facilities. All cases recovered. The affected age group was 5-

									59 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
WB/NOR/2026/33/1365	West Bengal	North 24 Parganas	Acute Gastroenteritis	218	0	10-08-2026	10-08-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Bhatenda (CT), Sub-District Rajarhat, District North 24 Parganas. Block RRT investigated the outbreak. House to house survey was done. A medical camp was established in the affected area. Medicine and ORS packets were given to cases. 1 patient was treated at BPHC Rekjoani. Both children and adults were affected. The population of the affected area was 3500. Overhead tanks were cleaned in the locality. Chlorination of water sources was done. 6 water samples were collected and sent to the WBPHL were non-potable. Chlorine tablets were distributed to the households. People were advised to consume boiled water for drinking purpose. Community awareness and health education given by the peripheral team on safe drinking water, hygiene and sanitation.

DISEASE OUTBREAKS OF PREVIOUS WEEKS REPORTED LATE

Unique ID.	Name of State-UT	Name of District	Disease-Illness	No. of Cases	No. of Deaths	Date of Start Outbreak	Current Status	Comments- Action Taken
