34th wk of Every Year

Unique ID.	Name of State-UT	Name of District	Disease-Illness	No. of Cases	No. of Deaths	Date of Start of Outbreak	Date of Reporting	Current Status	Comments- Action Taken
AS/BAJ/2026/34/1369	Assam	Bajali	Suspected Food Poisoning	132	0	17-08-2026	18-08-2026	Under Surveillance	Cases of abdominal pain, loose watery stools and vomiting were reported from Village Suk-Manah (Sukumanaha), Sub-District Sarupeta (Pt), District Bajali. District RRT investigated the outbreak. Both children and adults were affected. The affected persons had consumed pre-soaked chana and green mung prepared with coconut and ginger during the Independence Day event at Pallarpar H.S. School. 2 drinking water samples collected were found unsatisfactory on microbiological examination. 1 stool sample collected showed normal gut flora after 24 hours of incubation. Tests were conducted at Barpeta Medical College and Hospital. Medical camps, house-to-house case searches, active surveillance, symptomatic treatment and inspection of food preparation in the premises were conducted. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
AS/BAR/2026/34/1370	Assam	Barpeta	Fever	49	0	18-08-2026	20-08-2026	Under Surveillance	Cases of fever with body pain were reported from Village Baradi, Sub-District Barpeta, District Barpeta. District RRT investigated the outbreak. The clustering was from Kasturba Gandhi Girls' Residential School, Barpeta. The affected age group was 12-53 years. A medical camp was held in Kasturba Gandhi Balika Vidyalaya.

									Symptomatic treatment was provided to the cases. RDK for Malaria was done for all 49 cases, and were found to be negative. Community awareness and health education given by the peripheral team on VPD, water borne diseases, vector control measures, hygiene and sanitation.
AS/DHU/2026/34/1371	Assam	Dhubri	Measles	6	0	20-08-2026	20-08-2026	Under Surveillance	Cases of fever with rash were reported from Villages Boravila Pt-I, Amervita, and Kachuarkhash Pt-I, Sub-District Gauripur, District Dhubri. District RRT investigated the outbreak. Children under 10 years were primarily affected. Serum samples from all 6 individuals were sent to Guwahati Medical College and Hospital (GMCH) for laboratory testing, confirming two positive cases. Community awareness and health education given by the peripheral team on isolation of cases and vaccination, hygiene and sanitation.
AS/KOK/2026/34/1372	Assam	Kokrajhar	Fever with Rash	14	0	18-08-2026	18-08-2026	Under Surveillance	Cases of fever, small red spots, fluid filled blisters and itching were reported from Villages Tamukbari, Joypur, Ghugujhora and Khorakhat, Sub-District Bagribari (Pt), District Kokrajhar. District RRT investigated the outbreak. House to house surveillance was done in the affected area and adjacent villages. The affected age group was 5 months-13 years. 3 serum samples and 3 nasopharyngeal swabs were tested at GMCH Lab. The samples were negative for rubella and measles (IgM). Two doses of Vitamin A solution were administered. Community awareness and

									health education given by the peripheral team on isolation of cases and vaccination, hygiene and sanitation.
AS/NAG/2026/34/1373	Assam	Nagaon	Dengue	22	0	20-08-2026	21-08-2026	Under Surveillance	Cases of fever with bodyache were reported from Village Leprosy Colony, Sub-District Kampur, District Nagaon. District RRT investigated the outbreak. The affected age group was 26-51 years. 22 serum samples were collected from suspected patients and tested, out of which 6 serum samples were found to be positive for Dengue in ELISA Test (4 samples were Dengue NS1 ELISA positive and 2 samples were Dengue IgM ELISA positive) from DPHL, IDSP, Nagaon. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
BR/NAL/2026/34/1374	Bihar	Nalanda	Acute Gastroenteritis	59	0	18-08-2026	18-08-2026	Under Surveillance	Cases of loose motion and abdominal discomfort were reported from Villages Parasi and Noorsarai, Sub-District Noorsarai, District Nalanda. District RRT investigated the outbreak. The affected age group was 5-15 years. Medicine and ORS packets were given to cases. All cases recovered. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
BR/SAM/2026/34/1375	Bihar	Samastipur	Acute Gastroenteritis	50	0	21-08-2026	22-08-2026	Under Surveillance	Cases of loose motion and abdominal discomfort were reported from Village Padri, Sub-District Bithan, District Samastipur. District RRT investigated

									the outbreak. Cases fell ill after consuming prasad served during a religious ceremony in Padri village. Cases were treated at health facilities. Both children and adults were affected. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
CG/BAL/2026/34/137 6	Chhattisgarh	Balodabazar -Bhatapara	Jaundice	11	0	22-08-2026	22-08-2026	Under Surveillance	Cases of nausea, loss of appetite and fever were reported from Village Bhothadih, Sub-District Suhela, District Balodabazar-Bhatapara. District RRT investigated the outbreak. House to house survey was done. Cases were treated at CHC Supela. The affected age group was 6-60 years. 4 serum samples collected, tested negative for Hepatitis A (IgM ELISA). Chlorine tablets were distributed to the households. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/AMR/2026/34/137 7	Gujarat	Amreli	Crimean- Congo Haemorrhagic Fever	1	1	20-08-2026	20-08-2026	Under Surveillance	A 15-year-old male from Village Chanch, Sub-District Rajula, District Amreli, developed cold, fever, cough, and stomach pain on 14.08.2026 and was subsequently referred to Pulse Hospital, Bhavnagar, where he was admitted on 18.08.2026. A serum sample collected on 18.08.2026 was tested by IgM ELISA for Crimean-Congo Haemorrhagic Fever (CCHF) and tested negative on 18.08.2026. He died on 21.08.2026 due to liver failure. District and Block RRT

									investigated the outbreak. Activities were conducted in collaboration with the Veterinary Department. A house-to-house survey was conducted. 17 asymptomatic close contacts were monitored. 4 animal samples and 1 tick pool sample were tested at NIV Pune and found negative. Deltamethrin spraying was carried out in sheds/houses and on animals for tick control. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
GJ/ANA/2026/34/1378	Gujarat	Anand	Acute Diarrhoeal Disease	20	0	21-08-2026	21-08-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Village Moraj, Sub-District Tarapur, District Anand. District RRT investigated the outbreak. Both children and adults were affected. 3 water samples and 3 stool samples were tested at DPHL, Anand. All 3 water samples were found to be unsatisfactory for drinking, while all 3 stool samples were negative by culture. Of 464 rapid card (RC) tests performed to check proper chlorination, 432 were positive and 32 were negative. Chlorination tablets and ORS sachets were distributed, and pipeline leakages were identified and repaired. Community awareness and health education given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
GJ/MAH/2026/34/1379	Gujarat	Mahisagar	Guillain Barre Syndrome (GBS)	7	0	14-08-2026	17-08-2026	Under Surveillance	Cases of fever, abdominal pain, loose motion, leg weakness, cold/cough and visual complaints were reported from Village Urban Lunawada, Sub-District Lunawada, District Mahisagar. District

									RRT investigated the outbreak. House to house survey was done. The affected age group was 8-14 years. 4 stool and 8 water samples were collected. Stool samples were tested at B.J. Medical College Ahmedabad by culture; result awaited. Water samples sent to WASH Lab Lunawada were positive for bacterial contamination. All the cases were in stable condition. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.
HP/KUL/2026/34/1380	Himachal Pradesh	Kullu	Suspected Food Poisoning	41	0	19-08-2026	19-08-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Katrain, Sub-District Manali, District Kullu. District RRT investigated the outbreak. Cases were students of Primary School Badi. Cases were treated at CHC Patlikuhal. 5 patients were treated at RH Kullu. All cases recovered. ORS packets were given to cases. The affected age group was 4-12 years. Community awareness and health education was given by the peripheral team on safe food habits, hygiene and sanitation.
JK/BUD/2026/34/1381	Jammu and Kashmir	Budgam	Chickenpox	12	0	17-08-2026	18-08-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Government Primary School Bonahama, Sub-District Beerwah, District Budgam. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated symptomatically. The affected age group was 6-11 years. Out of 12 serum samples collected and sent to DPHL Budgam, 8 samples tested

									positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JK/KUP/2026/34/1382	Jammu and Kashmir	Kupwara	Chickenpox	16	0	21-08-2026	23-08-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Govt. High School Village Rajpora, Sub-District Zachaldara, District Kupwara. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated symptomatically. The affected age group was 12-15 years. Out of 8 serum samples collected and sent to DPHL Kupwara, 7 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JK/SAM/2026/34/1383	Jammu and Kashmir	Samba	Dengue	10	0	18-08-2026	18-08-2026	Under Surveillance	Cases of fever with body pain and myalgia were reported from Village Rakh Ambhtali, Sub-District and District Samba. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated at PHC Bainglar. Cases were in the age group 14-65 years. 18 serum samples collected from 14.08.26 to 09.09.26, tested positive for Dengue (NS1 Ag ELISA). Anti-larval activities and fogging was done. Community awareness and health education given by the peripheral team on vector control measures, hygiene and sanitation.

JH/EAS/2026/34/1384	Jharkhand	East Singhbhum	Chickenpox	7	0	17-08-2026	17-08-2026	Under Surveillance	Cases of fever with vesicular rash were reported from PM Shree KGBV School, Village Galudi, Sub-District Ghatshila, District East Singhbhum. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated symptomatically. The affected age group was 11-14 years. Cases were clinically diagnosed with chickenpox. Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
JH/WES/2026/34/1385	Jharkhand	West Singhbhum	Chickenpox	10	0	20-08-2026	20-08-2026	Under Surveillance	Cases of fever with vesicular rash were reported from Village Dhansari, Sub-District Kumar Dungi, District West Singhbhum. District RRT investigated the outbreak. House to house fever survey was done. Cases were treated symptomatically. The affected age group was 6-39 years. Out of 6 blood samples collected, 2 samples tested positive for <i>V. zoster</i> (IgM ELISA). Community awareness and health education given by the peripheral team on isolation of cases, hygiene maintenance and proper nutrition.
KA/BEN/2026/34/1386	Karnataka	Bengaluru South	Suspected Typhoid	12	0	24-08-2026	17-08-2026	Under Surveillance	Cases of fever with nausea and abdominal pain were reported from Village Ajjanahalli, Sub-District Magadi, District Bengaluru South. District RRT investigated the outbreak. House to house survey was done. Cases were treated at Taluk General Hospital & private hospitals. 12 blood samples collected, tested positive for <i>S. typhi</i> by widal test. Cases were in the age group

									1-35 years. All cases recovered. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water and food habits, hygiene and sanitation.
KA/HAV/2026/34/1387	Karnataka	Haveri	Acute Diarrhoeal Disease	81	0	20-08-2026	20-08-2026	Under Surveillance	Cases of loose motion and vomiting were reported from Village Kalkoti, Sub-District Savanur, District Haveri. District RRT investigated the outbreak. House to house survey was done. Cases were treated at a medical camp established in the locality and at DH Haveri. The probable cause of the outbreak was contaminated water. All cases recovered. Most of the cases were in the age group 16-59 years. 5 stool samples, 4 blood samples, and 4 water samples were collected and sent to IPHL, Haveri. All 5 stool samples were negative for enteric pathogens and Vibrio cholerae by culture. Escherichia coli and Klebsiella spp. were isolated from the 4 water samples. No growth was observed in the 4 blood samples after incubation. Pipeline leakages were repaired by PHED. Chlorination of water sources was done. Community awareness and health education was given by the peripheral team on safe drinking water, hygiene and sanitation.
KA/RAI/2026/34/1388	Karnataka	Raichur	Suspected Food Poisoning	81	0	18-08-2026	19-08-2026	Under Surveillance	Cases of loose motion, vomiting and abdominal pain were reported from Village Mallapur, Sub-District Devadurga, District Raichur.
